

# Worship Analysis: 5 Quarter Comparison

With so much data collected in multiple different areas of ministry over multiple years, it's important to have an easy way to analyze the data in relevant context. In the Tracking and Statistics Analysis tab, users can see all data from the 7 main ministry categories compared in three ways. Users can compare the year to date statistics compared with the same time frame from the previous year, compare the previous 5 complete quarters, or compare any 2 completed years. All three of these methods will also compare the statistics to the Healthy Church Benchmarks to allow users to quickly assess the growth of the church and see any areas of strength or weakness.

## Measureable Wins

- Life Change:** We believe inspiring worship will impact the entire person from the inside out to the extent that the person will be motivated to take the next steps in their relationship with Jesus Christ.
- Initiative:** We want to create a worship experience that inspires people to invite others to church where they will meet new friends and find a church home.
- Growth:** We believe that increased numerical and financial growth is a by-product of inspiring life-changing ministry where people have a meaningful encounter with the God of the universe.

5 Quarter Comparison	Quarters					% Change	
	Q3 2022	Q2 2022	Q1 2022	Q4 2021	Q3 2021	3 Quarters	5 Quarters
